

How do you get to the Remote Data Entry:

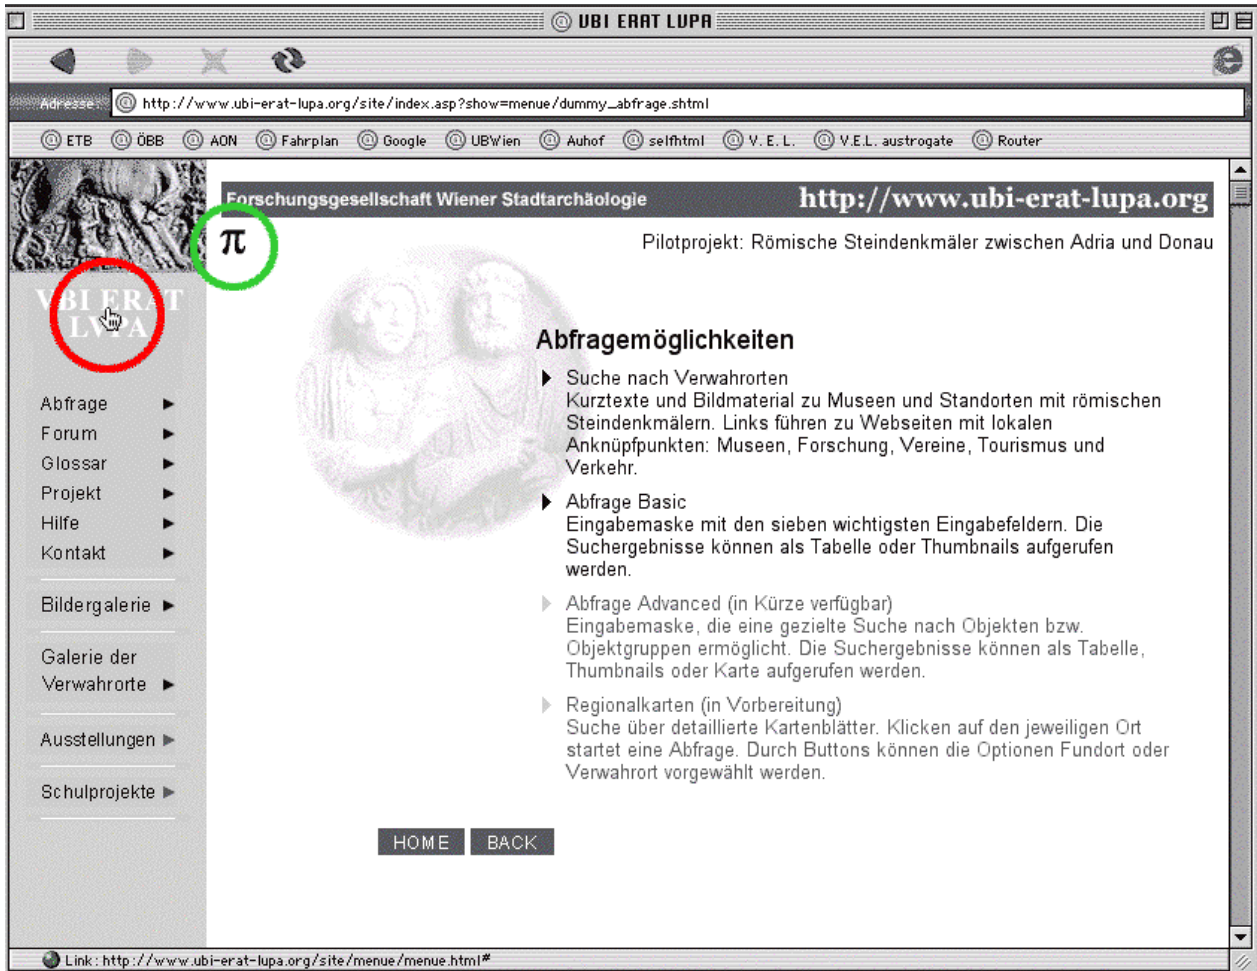

Fig. 1: Use the hidden functions to access Remote Data Entry

You can access the Remote Data Entry from every page of the website that shows a menu-frame:

1) Move the mouse pointer over the **VBI ERAT LVPA** logo (Fig.1: red circle) and wait some seconds.

2) A pi-Symbol (Fig. 1: green circle) will appear in the left upper corner of the neighbouring frame: click it!

!!! If your browser does not support our little hide & seek game you can type this address:

<http://www.ubi-erat-lupa.org/site/index.asp?show=secret/communication.asp>

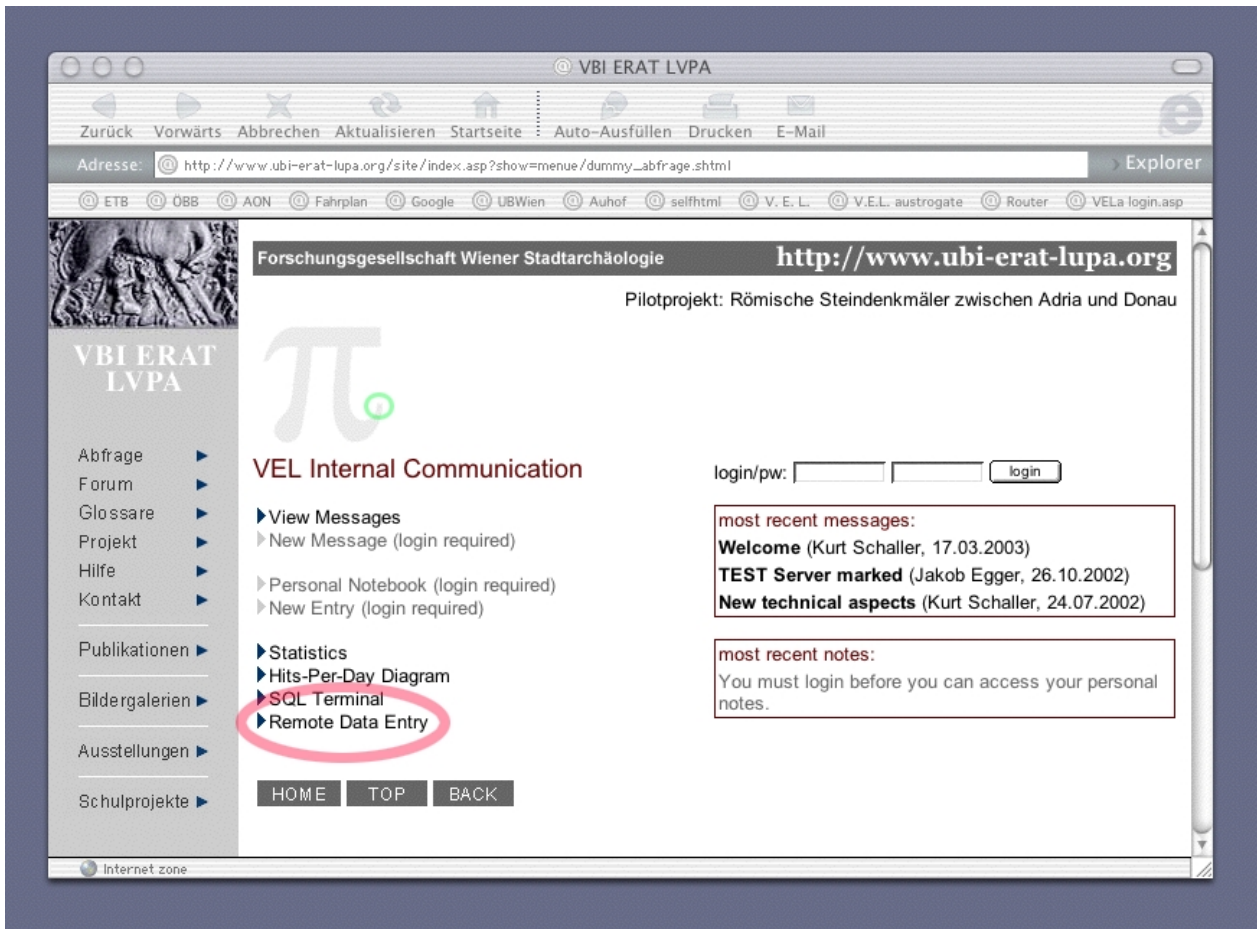

Fig. 2: VEL Internal Communication page

3) Click "Remote Data Entry" (Fig 2: red oval) on the VEL Internal Communication page and enter your username/password on the page that will appear now. Then click the „login“ button.

Welcome to the secret dungeons of LVPA.

By the way:

If you once feel too happy, too unhappy, too inspired, too uninspired, or too whatever to keep on working at the moment try a click on the extreme end of the right „foot“ of the pi-logo (Fig. 2: little green circle).
